

KODS BECHRI

DATA SCIENCE STUDENT

Kods Bechri | Kods Bechri | Ben Arous,Tunisia

Email : qodsbechrifsm@gmail.com | Mobile : (+216) 97393006

PROFILE

Software Engineering graduate currently pursuing a Master's in Data Science. I have hands-on experience in full-stack and I'm particularly interested in data-driven applications and intelligent systems. Motivated, curious, and continuously learning

TECHNICALS SKILLS

- R, Python,SQL,Java
- **Frameworks & Tools**: Flutter, NestJS, FastAPI, PyTorch ,Figma, Git.
- **Methodologies:** UML, Agile (Scrum)
- **Unix commands(basics)**

EDUCATION

Master's in DATA Science — September, 2025 - June, 2027

Faculty of Science of Monastir - TUNISIA

Bachelor's in Computer Science — September, 2022 - June, 2025

Faculty of Science of Monastir - TUNISIA

Baccalaureate: Experimental Sciences — June, 2022

Mhamdia High School - TUNISIA

PROFESSIONAL EXPERIENCES

- **Fullstack Developer Intern**

Zetabox Software Engineering, Tunisia — February,2025 - Mai, 2025

Designed and implemented a cross-platform Flutter application integrating RESTful APIs built with NestJS and FastAPI.
Implemented authentication, facial recognition attendance, leave requests, and real-time notifications.
Collaborated in an Agile Scrum environment with regular sprint reviews.

- **Flutter Developer Intern**

wapply, France (Remote) — July, 2024 - September, 2024

Optimized the existing codebase and developed new features including an admin dashboard.
Conducted functional testing that reduced post-release bugs by 30%.
Worked within a Scrum framework with regular progress documentation.

- **Initiation Internship** — June, 2024 - July, 2024

Figeac Aero , Tunisia

Explored the company's IT infrastructure, including network and server architecture, intranet domain management, and technical process documentation.

ACADEMIC PROJECTS

3D Parallel Reconstruction — Neural Radiance Fields

- Implemented a parallel Neural Radiance Fields (NeRF) system with 111× GPU and 1.75× CPU speedup for real-time 3D reconstruction.
- Designed and trained a deep MLP network using mixed precision (FP16), achieving PSNR ~25 dB in 5,000 iterations (~3 min on T4 GPU).

Stack: Python · PyTorch · CUDA · OpenMP.

Data Migration Pipelines with Apache Hop:

Design and development of Apache Hop pipelines to automate data migration from MongoDB to PostgreSQL and then to MariaDB.

MID-TERM PROJECT : Parapharmacie Smart Shop:

- Built an intelligent mobile app for parapharmacy product recommendations.
- Collected data using Python (web scraping with Beautiful Soup).
- Trained a recommendation model and integrated it into a Flutter app with a chatbot interface.

LANGUAGES

- **Arabic :** native language
- **French :** advanced
- **English :** advanced
- **German :** Basic User(A2)
- Italian Beginner(A1)
